

## *SUNWATTS – Leased System Information*

### **Information on Leased Renewable Energy Systems**

This information is provided for members and installers who intend to install a leased renewable energy system through Mohave Electric Cooperative's (MEC) SunWatts Renewable Energy Incentive Program. Leased systems are not eligible for rebate or incentive, under the terms and conditions of MEC's SunWatts Renewable Energy Incentive Program approved by the Arizona Corporation Commission (ACC).

The steps for the program for leased systems are as follows:

1. Submit Step 1 "Enrollment form leased 2018"
2. After MEC approval of the Enrollment form, submit the "Interconnect form 2018", Interconnect Disclaimer 2018", and the "Distributed Generation Service (DGS) Application"
  - a. Note that the DGS Application is optional
3. After MEC approval of the Interconnect forms, proceed with the system installation
4. Install signage according to the "MEC Solar Signage" guidelines form
5. After installation and signage are completed, submit "Step 3 – System Qualifications 2018 (Contractor Certification) and "Step 4 – Final forms"
6. Contact MEC's Energy Management Department to schedule the MEC system verification visit at the system installation site
7. After the system verification site visit and MEC approval, the system may be placed into service and operated

For additional information, contact the MEC Energy Management Specialist at 928.763.1100
